# INSIGHTS

## ADDICTION: A PATH TO MEDICINES FOR TREATMENT

**From painkillers to stimulants to nicotine—addiction is real...and rampant.**

- In the U.S., more than 20 million people have at least one addiction, yet effective treatments are woefully lacking.
- Substance abuse leads to \$740 billion per year in costs related to crime, lost work, productivity and healthcare.

**Sanford Burnham Prebys scientists believe they are on a path to help people fight addiction.**

Hear from our top researchers on the prospects of a novel therapy to treat people who suffer from substance abuse, and how this may help them from relapsing after successful treatment. Join us as we share our breakthroughs and discoveries, including details of a clinical trial to move this critical research forward.

**Join our virtual event!**

**TUESDAY**  
**OCTOBER 27, 2020**  
2:00–3:00 PM

**Nicholas  
Cosford, Ph.D.**

Deputy Director,  
NCI-Designated Cancer  
Center

Professor, Cancer,  
Molecules and  
Structures Program

**Michael  
Jackson, Ph.D.**

Senior Vice President,  
Drug Discovery and  
Development

Conrad Prebys Center for  
Chemical Genomics

Professor,  
Cancer, Molecules and  
Structures Program

NCI-Designated  
Cancer Center

**Douglas  
Sheffler, Ph.D.**

Research Assistant  
Professor

Cancer, Molecules and  
Structures Program

NCI-Designated Cancer  
Center

**A Q&A session following the presentation will give you an opportunity to personally connect with our scientists and have your questions answered.**
